Profile

Computer Science undergraduate good at full-stack web development and programming concepts. Worked on building web applications using technologies such as JavaScript, Node.js, Express.js, MongoDB, and WebSockets. Interested in developing scalable applications and continuously learning modern web and AI technologies.

Technical Skills

- Languages: Java, Python, JavaScript
- Frontend: HTML, CSS
- Backend: Node.js, Express.js
- Database: MongoDB, SQL
- Tools: Git, GitHub, VS Code

Projects

Hospital Management System

Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB

- Developed a hospital management web application for appointment booking, patient record management, and prescription generation.
- Built backend APIs for handling patient registration and scheduling workflows.
- Improved workflow efficiency for small clinics through digitized record handling.

Real-Time Messaging Application (IOMP / DropChat)

Tech Stack: HTML, JavaScript, WebSockets

- Contributed to a real-time messaging platform enabling quick communication between users.
- Implemented WebSocket-based instant messaging functionality for low-latency communication.
- Focused on lightweight UI design and efficient message delivery.
- Collaborated in team-based project development using GitHub.

Education

B.Tech in Computer Science and Engineering

CVR College of Engineering

2023 – Present | CGPA: 8.39

Intermediate (TSBIE)

Narayana Junior College

2021 – 2023 | Percentage: 97.9%

Certifications

- Become a Full-Stack Web Developer — LinkedIn Learning, 2026
- Innovating with Google Cloud AI — Google Cloud, 2026
- Generative AI for Web Developers — AI-Powered Pair Programming for Full-Stack Development — LinkedIn Learning, 2026
- SQL Essential Training — LinkedIn Learning, 2026
